Rabbit anti-Human Fibrinogen Polyclonal Antibody Datasheet

Product Name: pAb Rabbit anti-Human Fibrinogen **Catalogue No.:** AI80002 **Quantity:** 0.1 mg/vial

Description: Rabbit anti-human fibrinogen polyclonal antibody, purified with a protein G affinity column

Product Type: Primary antibodies

Target Protein: Human fibrinogen

Immunogen: Purified human fibrinogen

Specificity: This antibody recognizes human fibrinogen.

Host: Rabbit

Reactivity: Human, others not tested

Formulation: Lyophilized from a solution of 0.01M PBS, pH 7.4. To reconstitute, add appropriate volume of dH₂O to reach a final antibody concentration of 1.0mg/mL.

Research: Biochemistry

Application: Suggested application and antibody working condition: **Western blot:** 1:5,000 to 1:50,000 dilution. **Indirect ELISA:** 1: 200,000 to 1:400,000 dilution for wells coated with 800ng/well antigen. **Immune-depletion:** The antibody can be used for fibrinogen removal from human blood sample using affinity method.

Experimental data:

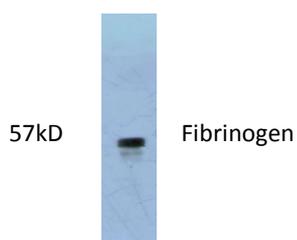

Fig.1: Western blot analysis of human fibrinogen (1.5µg) using anti-human fibrinogen polyclonal antibody.

Storage: Store at -20°C. Avoid repeated freeze/thaw cycles.

References: If research is published using this product, please inform Anogen in order to cite the reference on this datasheet. Anogen will provide one unit of product in the same category as gratitude.

This product is for **LABORATORY RESEARCH USE** and further manufacture **ONLY**, and cannot be administrated to human and animals for use in diagnostic and therapeutic procedures.
