

Mouse Anti-Human GP IIb/IIIa Monoclonal Antibody Datasheet

Product Name: mAb anti-Human GP IIb/IIIa

Clone No.: 262

Catalogue No.: MO-M40040N

Quantity: 0.5 mg/vial

Description: Mouse monoclonal antibody to human platelet membrane glycoprotein IIb/IIIa (GP IIb/IIIa)

Purification: Protein G affinity purified

Product Type: Primary antibody

Target Protein: Human platelet membrane glycoprotein IIb/IIIa (GP IIb/IIIa)

Immunogen: Human platelet suspension.

Fusion Myeloma: Sp2/0-Ag14

Specificity: The mAb is reactive to platelet coated ELISA plate.

Species Reactivity: Human, others not tested

Host / Isotype: Mouse, Ig2b Kappa

Formulation: Lyophilized from a solution in 0.01M PBS, pH 7.2

Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00mg/mL.

Storage: Store at -20°C

Research Area: Hematology, blood coagulation

Background: Human platelet membrane glycoprotein Glycoprotein IIb/IIIa (GP IIb/IIIa) is a dominate receptor on the platelet membrane with very high molecular weight (>200kDa). After the platelet is activated, the GP IIb/IIIa receptor complex changes conformation and binds to fibrinogen in blood circulation with high affinity. The activation of platelets is initiated locally when the endothelial layer is wounded and the platelets are exposed to the collagen underneath the endothelium. The fibrinogen aggregates with platelets when binding to the GP IIb/IIIa receptor on platelets, thus primary haemostasis (Platelet clot) is formed.

Applications: **ELISA:** The mAb is reactive to platelet coated ELISA plate.
